Тираж монет:	до 5 000 шт.
Количество комплектов:	100 шт.

The "Holy Helpers" are a special group among all the saints of Christianity as it is believed that their intercession is particularly effective. Most of them lived at the turn of the 3rd and 4th century A.C. at the time when Christians were victims of bloody persecution within the Roman Empire. It is believed that the saints can also protect against a number of other diseases; they are also patrons of many professions, social groups and cities.

They enjoy a special position in popular religious statuettes, figures and medallions bearing their images are by many treated as amulets endowed with magical powers which can help in the hardships of everyday life.

The series aims at presenting those of the saints who enjoy a special popularity in the Christian countries - all over the world. The coins of particular will bear images of their characteristic attributes. The images of the saints, inspired by their various presentations in engravings and paintings will follow the Gothic style.

Saint Catherine of Alexandria is the patron saint of many professions, but above all scholars, philosophers and students. Many universities have chosen her as their protectress.

Saint Margaret is a virgin and martyr, who lost her life at the age of fifteen due to her Christian faith. She is the patron of wives, young women, midwives, people with eyesight problems, the wounded and all those who resort to her aid.

Saint Barbara is one of the Virgins Capitales and is particularly venerated for her courage. She is the patron of all people who risk their lives, such as miners, sappers and soldiers.

Saint George is an enormously popular saint. He is a patron of soldiers, monasteries and especially revered as a patron of international scouting movement.

Saint Christopher is venerated as the patron of teachers, pilgrims and travellers - especially drivers who place his image in their cars to arrive safely to their destinations.

Комплект предлагается в очень ограниченном количестве – всего 100 штук.
